pool covers... no
company builds them
stronger than Coverstar!*

PROTECTION *at the touch of a button!*

A swimming pool is the ultimate enhancement to your lifestyle and your home's value. A place for family fun, relaxation, and entertaining friends. Yet there is also the time spent on cleaning and maintenance – and the cost of heating, water, electricity and chemicals. As well as, of course, the safety concerns of a child getting access to an unsupervised pool.

A Coverstar automatic safety cover is the best protection available for your family and your pool investment. Simply flip a switch, and your Coverstar automatic safety cover will create a barrier over your pool that no child or pet can penetrate. A Coverstar cover keeps heat, water and chemicals in – and keeps dirt, debris and the elements out.

Owning a Coverstar cover means never having to worry about safety, or about spending too much time or money on pool upkeep.

The weather-proof toggle switch opens or closes your pool in less than a minute. And it locks for secure access!

SAFETY... the strongest name in automatic safety pool covers!

The stronger the cover, the safer the cover. No company builds in more exclusive design and manufacturing features to ensure the strength and performance of its automatic covers than Coverstar!

Heat-sealed webbing for double the strength! Most automatic cover manufacturers sew webbing material wrapped around rope to the cover. With this method, the webbing often fails before the fabric does. Coverstar uses an exclusive, patented process to heat seal webbing around a polymer bead and weld it to the cover in one step. **Independent lab tests show Coverstar's webbing is over twice as strong as competitive webbing sewn to a cover!**

Incredibly strong and durable fabric. Advanced vinyl formulation and superior fabrication methods make the fabric used in Coverstar automatic safety covers top of the line!

Patented Heat Seal Bonding Process

SAVINGS... *more enjoyment, less cost, and much less work!*

What's the best way to maximize the time you spend enjoying your pool, and minimize your maintenance time and cost? Simply use your Coverstar automatic safety cover whenever you're not using your pool!

Save on heat, water, electricity, and chemicals. According to the U.S. Department of Energy*, a cover is the best way to reduce heat loss in your pool. A Coverstar automatic safety cover acts as a passive solar heater, increasing the temperature of your water by 8 to 10 degrees. It also reduces evaporation of water as well as consumption of chemicals.

Eliminate time-consuming cleaning and maintenance! A Coverstar automatic safety cover keeps dirt, leaves and debris out of your pool. Time spent cleaning out dirt and leaves and putting in new chemicals is almost eliminated!

Coverstar delivers big savings ... automatically!

90% reduction
in evaporation

70% reduction
in pool heating costs

50% reduction
in electricity costs

70% reduction
in chemical use

RELIABILITY... engineered for decades of hassle-free performance.

The legendary reliability and durability of Coverstar automatic safety covers has made us the undisputed industry leader. Coverstar engineering is based on more than 35 years of experience in the field.

Corrosion-resistant, precision components. Our unique mechanism is engineered with heavy-duty stainless steel components that resist corrosion even in salt water environments. Our ropes and pulleys are more reliable than any others used in the industry. The extreme precision of the machined and laser-cut parts allows for smooth operation and many, many years of hassle-free use.

Coverstar motors are completely sealed, using a proprietary method, to prevent water damage. Other less reliable means of water protection could mean an expensive motor repair.

PowerFlex™ Ropes act like a shock absorber and self-adjust during operation for more reliable performance. And they're the only ropes that come with a two-year no-break guarantee!

Mechanical torque limiter is adjustable to protect the motorized mechanism from too much stress.

Custom designed rope pulleys provide maximum reliability in the pool environment.

Exclusive 20-YEAR warranty on mechanism.

OPTIONS... *an automatic safety cover for every need and every pool!*

Coverstar automatic safety covers can be applied to a broad range of pool designs and types. Options include:

Many other custom colors and fabric weights are also available.

Guide options:

Underguide systems are embedded in the pool wall or mounted to the bottom side of rectangular pools' coping, allowing guides to remain virtually unnoticed. For a more integrated look, guides can be built directly into the pool wall using guide encapsulation.

Topguide systems can be used with most freeform pools. The cover's drive system is installed under an aluminum lid or mounted to the surface of the deck.

Recessed guide systems feature aluminum guides that are recessed in the pool deck during the construction of the pool. The recessed guide is flush with the top of the deck.
